

## Essential Lens Software ELS ELS Optional Function with Extend-Lisence

**ELS Ex-Licence** adds the function of positioning for 3-type mechanical zoom len.

Then, ELS main window displays [**Zoom Pos**] menu with Extend-Licence.

**[Zoom Pos] Menu** function searches zoom lens movement to yield the indicated EFL for infinite conjugate of mechanically compensated zoom lens.

- **[2-Group Zoom Lens]** submenu shows a dialogbox to calculate the space between the 1st group component(G1) and the 2nd group component(G2) to yield the indicated E.F.L. of the infinite conjugate mechanical zoom lens.
- **[3-Group Zoom Lens]** menu shows a dialogbox to calculate the position of the 3rd group component(G3) for the indicated space between the 1st group component(G1) and the 2nd group component(G2) to yield the indicated EFL of the infinite conjugate of mechanical zoom lens.
- **[4-Group Zoom Lens]** menu shows a dialogbox to calculate the zoom positions for infinite conjugate of 4-group mechanical zoom lens. The positions of the 1st group component and the 4th group component are fixed.
